

Dan Peetz of Skyline Physical Therapy presented on Temporomandibular Disorders (TMD) to students, faculty, staff, and professional guest attendees of Creighton University's School of Dentistry 2015 Fall Dental Assembly in September. Dan's presentation covered various topics of TMD including the problems associated with the disorders, biomechanics for prevention and treatment, and various modalities to treat the disorders and when it is appropriate to seek treatment due to complications related to Temporomandibular Disorders.
