

## FUNCTIONAL DRY NEEDLING® CONSENT AND REQUEST FOR PROCEDURE

Functional Dry Needling® (FDN) involves inserting a tiny monofilament needle in a muscle or muscles in order to release shortened bands of muscles and decrease trigger point activity. This can help resolve pain and muscle tension, and will promote healing. This is not traditional Chinese Acupuncture, but is instead a medical treatment that relies on a medical diagnosis to be effective.

FDN is a valuable and effective treatment for musculoskeletal pain. Like any treatment, there are possible complications. While complications are rare in occurrence, they are real and must be considered prior to giving consent for treatment.

**Risks:** The most serious risk with FDN is accidental puncture of a lung (pneumothorax). If this were to occur, it may likely require a chest x-ray and no further treatment. The symptoms of shortness of breath may last for several days to weeks. A more severe puncture can require hospitalization and re-inflation of the lung. This is a rare complication, and in skilled hands it should not be a major concern. Other risks include injury to a blood vessel causing a bruise, infection, and/or nerve injury. Bruising is a common occurrence and should not be a concern.

**Patient's Consent:** I understand that no guarantee or assurance has been made as to the results of this procedure and that it may not cure my condition.
